State FFA Floriculture 2000 Career Development Event General Knowledge Section

DIRECTIONS: Select the best answer and mark your selection on the separate answer sheet provided. Using a #2 pencil, black out completely the letter that corresponds to the best answer for each question.

- 1. Pinching is a process that:
 - a. reduces space requirements
 - b. promotes flowering
 - c. promotes branching
 - d. reduces disease problems
- 2. Which of the following is a growth regulator?
 - a. Marathon
 - b. Sevin
 - c. B-Nine
 - d. Orthene
- 3. Which of the following is not generally used as a potted crop?
 - a. Snapdragons
 - b. Mums
 - c. Hydrangea
 - d. Gerbera Daisy
- 4. Which of the following is primarily used as a cut flower crop?
 - a. Iris
 - b. Statice
 - c. Lillies
 - d. All of the above
- 5. Identify the flower considered a line flower:
 - a. Liatris
 - b. Carnation
 - c. Alstromeria
 - d. Baby's Breath
- 6. Large leaves are often removed from a germanium plant in late winer to:
 - a. Permit more light to reach young growth
 - b. Reduce space requirements
 - c. Reduce disease problems
 - d. Force the plant to set bud
- 7. A shade cloth is pulled over a greenhouse to:
 - a. improve bud count
 - b. increase temperature
 - c. elongate stems for taller plants
- 8. An insecticide should never be used in the same sprayer the has been used to apply:
 - a. miticides
 - b. Herbicides
 - c. Fungicides
 - d. None of the above
- 9. A cultivated variety is referred to as a:
 - a. mutation
 - b. wild variety
 - c. cultivar
 - d. vegetable variety
- 10. How many extra plants would you order if you need 300, buy you place an order for 5% extra, just in case some dies or get damaged?
 - a. 315
 - b. 15

- c. 5 d. 305 11. Which of the following should not be used as a bedding plant in Georgia in June? a. begonia b. pansy c. salvia
- 12. PPM is...
 - a. parts per million
 - b. parts per month
 - c. pesticides per million
 - d. none of the above
- 13. Which of the following is an organic material?
 - a. leaves

d. zinnia

- b. landscape fabric
- c. clay pot
- d. none of the above
- 14. The best time to prune azaleas is...
 - a. just after flowering
 - b. year roundc. late winter

 - d. all of the above
- 15. How many pounds of nitrogen are in a 100 pound bag 10-15-10?
 - a. 10
 - b. 15
 - c. 5
 - d. none of the above
- 16. Stem cuttings are used to propagate
 - a. peppers
 - b. poinsettias
 - c. boston ferns
 - d. all of the above
- 17. Ventilation is necessary in a greenhouse to...
 - a. regulate temerature
 - b. adjust the temperature
 - c. provide air movementd. all of the above
- 18. Most bedding plants are sexually propagated by...
 - a. leaf cutting
 - b. tissue culture
 - c. division
 - d. none of the above
- 19. Which of the following are common colors of poinsettias?

 - a. red, pink, whiteb. red, yellow, orange
 - c. red, white, blue
 - d. pink, white, variegated
- 20. The process by which the energy of sunlight is converted into chemical energy by green plants is known as:
 - a. phototropism
 - b. photosynthesis
 - c. photoperidismd. transpiration

21 10 10 10 :	an avample of
	s an example of:
	pe of insurance
	yment plan
	tilizer analysis
d. gre	eenhouse bench design
22 F1	. 1 . 11
22. Fluorescen	
	heat producing bulbs that emit light in the red spectrum
b. blo	oom in the spring
	ovide the best artificial light source
d. noi	ne of that above

31. Which crop produces stolons?

a. onions
b. strawberries

- c. irish potato
- d. none of the above
- 32. Which of the following plants produce adventitious roots?
 - a. English ivy, heart leaf philodendron
 - Tomato, peppers
 - c. Peace lilly, jade plant
 - d. Snak plant, aloe
- 33. plays an important role in getting Easter lilies to flower on time.
 - day length
 - b. pot size
 - c. temperature
 - d. all of the above
- 34. A greenhouse cooling system where large exhaust fans draw air through a moistened pad mounted on the opposite end of the structure is called...
 - a. evaporative cooling
 - b. air conditioning
 - c. humidity cooling
 - d. none of the above
- 35. Molluscicide is used to control...
 - a. snakes
 - b. spiders
 - c. slugs
 - d. moles
- 36. Identify the signal words that may be used on a pesticide label...
 - a. danger, warning, caution
 - b. poison, lethal, caution
 - c. warning, deadly, dangerousd. none of the above
- 37, BPM is...
 - a. better made plastic
 - b. best management practices
 - c. best planted on Mondays
 - d. none of the above
- 38. What is a chemical messenger produced by plant tissue that controls plant growth?
 - a. hormones
 - b. ethylene
 - phosfon c.
 - d. floral
- 39. Hardiness refers to a plants ability to...
 - a. withstand warm temperatures
 - b. withstand cold temperatures
 - c. withstand drought conditions
 - d. withstand wet conditions
- 40. Percolation is...
 - a. preparing coffee for your teacher
 - b. movement of nutrients in a plant
 - c. downward movement of water in the soil
 - d. physical arrangement of soil particles
- 41. Crushed limesone is added to the soil to...
 - a. lower the pH
 - b. raise the pH
 - c. none of the above
 - d. all of the above

42.	a. b. c.	pe of pot used in plant production depends on what factors? growth habit of the plants where the plants will be used color of the container none of the above
43.	a. b. c.	is the most widely usd irrigation system used for potted plants? hose watering tube irrigation overhead mist system
44.	a. b. c.	are naturally occurring nutrient materials that are derived from plants or animals. inorganic fertilizers fluoridation organic fertilizers all of the above
45.	a. b. c.	operiodic describes a plants responses to changes in day and night temperatures changes in day and night length length of germination period all of the above
	ised to i a. b. c.	es of air enter the end of the cut flower stem and block water movement. What practice(s) may reverse it? remove 1 to 2 inches of the stem and place in fresh water re-cut the stems under water nonoe of the above all of the above
47.	a. b. c.	al arrangement is if the two halves are equal in size and shape. asymmetrical symmetrical balanced harmony
48.	a. b. c.	arrangements should be 1 ½ times as tall as the container 2 ½ times as tall as the container As wide as it is tall 2 times as tall as the container
49.		of the following plants may be reproduced by using leaf blade cuttings? rex begonia strawberry marigold vinca
50.	Indirection a. b. c. d.	planted at school planted in germination media and transplanted seeds carried by the wind none of the above
