

MSSC CERTIFICATIONS

The Manufacturing Skill Standards Council (MSSC) offers the Certified Logistics Technician (CLT) and the Certified Production Technician (CPT) programs. MSSC is an industry-led training, assessment and certification system focused on the core skills and knowledge needed by the nation's front-line production and material handling workers.

MSSC has the only two certifications for front-line logistics workers that are accredited by the American National Standards Institute (ANSI) under ISO Standard 17024 (Personnel Certification). MSSC offers both entry-level and incumbent workers the opportunity to demonstrate that they have acquired the skills increasingly needed in the technology-intensive jobs of the 21st century.

MSSC ensures that all of its instructional materials, instructor training, and assessments are based upon those industry-defined national standards. In other words, MSSC teaches to the standards, not to the test. Our goal is to help ensure that MSSC certificants increase their skills and enhance their performance on the job in alignment with industry needs.
