⁽¹⁾ - Student Success Rate is a new measure for 2014-2015 and was defined by SCTCS as a performance funding measure. Prior year data is the sum of the graduation and transfer out rates.

⁽²⁾ - Graduate Production Rate is a SCTCS derived statistic that is used as part of the performance funding calculation. Prior years have been calculated, but 2013-2014 was the first year that a goal was set.

⁽³⁾ - Graduate Placement Rate comes from the Program Evaluation Reports which are not available until June of the following year, therefore figures reported for 2013-14 are actually 2012-2013 data.

⁽⁴⁾ - Licensure/Certification Pass Rates come from the SCTCS T-Web dashboard report and consists of all applicable licensure/certification exams. Although in use, SCTCS will re-evaluate this year.

All highlighted (blue) measures are performance funding measures beginning in 2014-2015 and the goals have been set by SCTCS.
